The Gorman papers of the city and State would do well to copy the above. The difficulty experienced by the Marshals in gotting the necessary facts from citizens of fareign birth arises, doubtless, wholly from misapprehamions, which may be removed by a facests of explanation and advice.

A year ago last winter, two negro girls, held stavery is Nobraska, (there's a squatter soverighty from,) escaped from their master, and was supposed, crossed the Missouri river to laws. Their owner fading plenty of the property of the property of a property of the property of an arrest of the property of an arrest of the property of an arrest of the property of th personal for the service organized an armed early for pursuit, and as soon as they were the love sell, commenced breaking into and searching citizens houses and committing various other offences against the law, order and decency which prevail in a free Stale. Of course they had no warrant or they of authority. Like the Missouri nigger-catchers in Southern Illinois, they proceeded ine right to all the darkies he can get, and to which and hold them wherever they can be bound. The girls were not captured; their went went backminus his chattels but with a beavy bill for his Democratic posse and their whisky, which in all higger-catching expadicions somehow is sure to flow. One R.S. Williams, of course a postilent "Aboliticalist," with just enough effrontery to maintain that has rights that even nigger-catchers are and to respect, seems not to have liked the proceedings of these marsuders. He sued the proceedings of these marsuders. He sued the would be master, the owner of the flying chattlel; and we see by an Iowa paper, that he has recovered eight thousand dollars damages, in full, we suppose, for the insulis and injuries to which he and his family were sub-

We stated, a f. w days ago, that there was with the States of Central America, by reason than explained that these English had gone there under the guaranty of the British Gov-erament, which guaranty it was able to give, in consequence of its treaty stipulations with the Eostanese. That treaty is new abrogated of her sovereignty—a step which the settlers feel determined to resist at all hazards. We stated that they were calling for recruits with a view to increase their strength and maintain their position. Their call has been responded to, and now advices from New Orleans repre-easy that Americans are pouring into Reaten (the largest of the islands) with every art val; and we are told by the telegraph that Walter,

But that requirement has not been observed
in consequence of an attempt of the Democrats to perpetrate a monstrous gerry mander in

Much the larger portion of this be 1,306,630. Much the larger portion of this gain, was in the Marthern, or Republican, counties of the State; but this prependerance of population counted for nothing in the contest for Senator. The misority ruled the majority, and Dauglas was accordingly re-elected, though a clear majority of population, as well as of votes, were opposed to him, and in fever of Lincoln.

Those figures tell the tale. An impection of them will show how Stephen inspect of Abraham was elected. Cook County has pop-Abraham was elected. Cook County has population enough for six House members and two Seinstors, but only has four of the former and one of the latter; 34,200 inhabitants of Cook are aistranchised for legislative purposes. The following Democratic districts which elected eight members, contained fewer inhabitants than Cook county, which was allowed but four members, viz the 6th, 11th, 221, 26th, 27th and 30st. The 48th district, with only operagrammatizative contained as many people almost as the 4th and 15th, and 18th, which have stree members! The 45th with one member has a population within a small fraction, equal to the Egyptian 5th, with two members. And the 36th with one member has a greater population than either the 26th or 77th, each of which has two members. The 45th and the 45th have each more unrepresented inslationists than is contained in almost any of the Egyptian districts. But it is insedies to specify further. The wide disparity is pishily seen by comparing the districts in the Democratic and Espublican line.

That the reader may fully comprehend the immense advantage personnel by Douglas in the population of the districts, let us reverse the ratio of representation, and suppose that 10,000 inhabitants would have been necessary to close a Democrati, and only 15,000 a Repub-

women who have stood by Garrison from the first, and who still constitute the jewel of the movement. Garrison binself is very clean and morement. Curriem himself is very ofeen and pure in all his life, mild as a saint in manner, while fierce of speech and terrible in a resolution. There is a considerable number of very infecie people in the mavement, diety and ignorant as the few are clean and pure, and it is amazing to see how kindly and gently cultivated and refined women and educated men have beens, for the sake of the cause, which would have been otherwise unendurable—contact with

I do so become Prisor the me and women, and because I know that the perverted action of even first rate minds will explain their words, and yet allow their purity of intent. The mine charity which I extend to Mr. Garrison, I extend to the extremists of the opposite achoel. IA prominent fact of the Anti-Slavery movement, is a strong reaction from Mr. Garrison to political Anti-Slavery. Dr. Cheever and many other leading Abolitionists assert that the Constitution is and shall be an Anti-Slavery docuother leading Abolitionists assert that the Constitution is and shall be an Anti-Slavery document. A new Society was formed this year on the basis of political opposition to Slavery. They descente most people but themselves, it is true—in which they may be said to have kept the faith of the Garrisonius—but their idea is a denial of Mr. Garrison's Apostles' croed, that "the Constitution is a covenant with death and an agreement with helt." The new Society is called the New England Political Anti Slavery Association. Rev. John Pierpont is its President. For abort, it is called Stephen S, Foster's Political Anti Slavery Society, he having been

the mover in denying the trarrannian drown, and in getting up a new organization. Hrs. Abby Kelly Poster is deeply grieved by hur burly ford's defection from the faith, and his britating squabbles with the Garrisonian on the platform of the latter.

The "Church anil-Slavery Society" held two very large meetings in Tremont Temple, mak.

rery large meetings in Tremont Temple, making the best show as to numbers of any of the asti-Slavery meetings. The report of the Secretary complained of the indifference of the churches, and it was generally admitted that the cause does not meet with a great deal of ayangsthy. Situring speeches were made, and listened to by a breathless sudience. The asti-Slavery feeling is not astive in the churches, though I think it is very strong, and would respond with great energy to anything whigh should touch personal duty at home a little closer than the way of presenting the subject usually does. The common sense and common charity of the churches will not be led out to "holter damn" at South Carolina. The Church and Slavery Seelety proposes little more than pious and ecclesiastical damnation of slaveholding, while the Carrisontans doe's mind being a

charry of the chartes and not a second whole dann's South Carolina. The Church soil Sievery Society proposes little more than plous and ecclesiastical damantion of siaveholders, while the Garrisontans doe's mind being a little professe, the church people think. I think held are to be seen that the professe, the church people think. I think held are to come the second of the compliance of the formers who mount their private mole hill Sinass to thunder indiscriminate condomnation at mistaken, or sina leg, or even ignorant and almost innocent alarcholders. The way of charity is to take the man with kindness and his ain with firmsess, or his gnorance with truth, or his mistake with persuasion, and so slay the wrong and are the parameter. A Bysts meeting was held Thursday croming. It was crowded and most enthusiastic. Mr. Sewall, Mr. Hyatt's counsel, and a lawyer of high position and spottess integrity, advocated Hyatt's claim to public cympathy. Concord Sanbors followed, and was received with tramendous applanet. Bev. Dr. Chewere came next and after thin Westell Phillips. Chewre indorsed the remark of an eminent divine, made apon hearing of the imprisonment of Hyatt as he was going into his prayer meeting. Breathers, faint or mad I can't groy. Phillips wis nearestly allowed to preceed for the applanes the greated him. He placed Hyat with the great aposities of liberty, and glorified him as mad.

the latter town, any offensive return from Pal-crame was impossible, or a least very carga-ous. The insurgents possessing Calatafimi, are masters of Trapani, Harraia. Massara, Castel Vetrano, and even Sciacco. But let us examine an instant this western part of the inland. Al-jamo is a town situated on a plateau in the midst of a plaine, it was formerly an Arab es-tablishinent, as its name indicated, and is well chosen to command several lattle ports, of which the pearest and most important is named Mag-arinanto. chosen to command several hittle ports, of which the nearest and most important in named Magninario.

From Palermo to Alnamo is rather more than 36 miles, and from Aleano to Calestalmi about eight. To go from Palermo to Alnamo me side with the control of the most admirable valleys of sicily, in which there are olive trose centeries old, and groves of crange and otive trose. But to passing the height which closes the valley to the north the series suddenly changes, and the upproach to Aleano is through and constains. Then, entering deep corres, we arrive at Caladalimi, a lover of soct 10,000 inhabitants, as astated in the newspapers, but of 4,000 or 5,000. The town, which is of wretched aspect, is dominated by a castle now quite in ruins. From this casile an extraordinary country is seen, the land and rocks being in confusion, as it tossed about by some terrible earthquake.

The Naspolitane ought to have defended these parts; not having done so, they have left great divisitions leaving the mountains, can surround Palermo, either by going to Bagaris on the cast, or in turning Moureals and occupying-the done, either the going to Bagaris on the cast, or in turning Moureals and occupying-the facts. The place of disembarkation of Garibaldi's bands was chosen with to maph intelligence as to eause no to suppose that he and his itentenants will profit by all the advantages which the nature of the country effords. Trapani is a pretty town formerly fortified, and has a sort of citade which commands the port. If it were not for the want of water, the town could easily be defended on the land side, as it is only united to the plain hyp. a tongree of land soci by salt marshes. From Calastimi to Trapani the read winds through tire-charinity, and on this read, a length of upwards of eighteen miles, there is not a bouse, such trae, set a shrub; lat a distance of two or three miles from Palerno and all other great towns, there is scarcely any trace of galitration. The inhabitants are so borne down by taxes on all they produce that they abandon the soil, though it is previags the most fertific in Italy, and the pessants contrived to live on a handful of pulse daily." and the great biston rods, about which some sporphemions were felt in consequence of their great length, will be strengthened by central atasetions. It is expected that through all these various improvements an increase of two knots will be obtained in the speed, and in orderthat they may be completed as abon as possible, Measra.—, of Greenwich, have undertaken a portion of the work. A new Trotsan anchor has been supplied in place of that which was loof at Holynead, the Directors believing that the strain which the anchor bore on that operation as the world. The greatest excitons are of course being made to have work things ready by the 9th of June, but there are many persons, well qualified to judge, who are very doubtful as to whether all will be complete by that time. Ferhaps, if the departure were street for attention that the beginning of June, abe will probably arrive at New York in the beight of the American dog-days, when the thermometre ordinarily stands at 120 degrees, and will not improbably res 50 degrees higher on hoard as black pointed iron able. However, curiouity overcomes many inconveniences, and it is further to be remandered that it will be the time of year when all the constry people pour into town to make their nummer purchases.

With respect to the new commander, Capi. Vice Hall, there is a universal concurrence of testimony as to his fitness for the important post to which he has been appointed. For many years he commanded steamships in the Modiferransan, Cape, Australia, South America, India, &c.

Yesterday was quite a lively day in contrast with other days in our usually quiest town. A brief notice had been given from mouth to mouth that there would be a pole raising and a speech or two—endorsing the National and State nominations; but no effort was made to draw a crowd, not even a bill struck. Baf a crowd we had; and when our large, beautiful flag was thrown to the breeze, from the top of our straight, beautiful pole—revealing the names of Lincoln and Hamlin, such a shoul went up, as the Democracy have not heard in went up, as the Democracy have not heard in these parts for many s day. The following were the proceedings:

The meeting was organized by calling J. Hasten to the chair, and appointing N. E. Way Secretary. R. W. Saddier, Wm. L. Benjamin and Dr. Huston were appointed a Committee on Resolutions, who reported the following:

Resolved, That we most heartily coincide in the nominations, by the Ohicage Convention, of Abraham Lincoln and Hannibal Hamilin.

Resolved, That W. Lincoln's unquestioned integrity, his distinguished ability as a statesman, his unspotted record and his personal character—not only pure but above suspicion, eminently characteries him as worthy of that high distinction.

Resolved, That we pledge our undivided support and influence to secure the election of the islate tickst.

The Atlantic Telegraph.

(Fron the M. Y. Post.)

Although nearly two years have slapsed since our anthusiasm in regard to the supposed successful completion of the Atlantic telegraph caused us to reaks a bone fire of our Oily Hall, the public should not think that the enterprise died with the disaster to the cable, which no soot followed that notable celebration. It is true, the time appointed for the resusciation of the work has fully come, and the volce of De Santy is no longer beauf in the land; but notwithstanding versitions telegra and populary journel, the originators of the great cheime—at least those of them in England—have by no means abundoned all hope of successfully laying an Atlastic telegraph cable.

But his delay has given rise to commedition.

But the delay has given rise to competition, and a new ocean telegraph project, called the Damish route, has been talked of. By this play the wires will driven from London to layer the wires and the Southerlandships mountain.

enterprise, carried away, doubtiess, by the spirit of competition, have endeavered to provide impossibility of the success of the previous undertaking, and have maintained that the researches of accenticle electricians have recently descent that the second to Trinity Bay cannot be laid, or, if laid, cannot be worked at a prefit. In: raply to these charges, Mr. George Saward, the Secretary of the Atlestic Telegraph Company, has published a long letter in the London papers, urging the fessibility of the original scheme, and showing forth its prospects of success. He asserts that there is nothing in the result of the effort of 150% which could be termed "a failure;" that the secondific questions involved in its origin and submyrsion have been fully solved, and that important unest to which it ministered while have the supportant unest to which it ministered while he working order randered the establishment by an Atlantic telegraph a necessity, and that the whole difficulty now arises from the simpless of causes—a fault in the insulation, which is sucmanigers have principally removed the configurate Delaware.

A Daramous Flavraino.—The little daughter of Ma. McDaniels, in Mason Country. Virginis, three years old, a few mornings since ran into the gard of the house highly delighted with a pretty plaything it had found, and was a taking it to show its mother. The mother was astonished to find it is large copper head anake! The child had one hand just below the neck, and the other about the middle, and the forked tongue of the venomous desture was projecting from his mouth in a most venomous manner. The mother was almost frightened to desth, and our informati says she has not got over the fright yet. A member of the family immediately ran to the child, and after some difficulty succeeded in rescuing it from its perillous situation, without being hitten.

STATEMENT OF ACCOUNT.

I have suspected George Howe, for more, than a year, of having designs upon my wife, and I have been convinced for four months past that he was carrying on a crasised intercourse with her. He int her fit several places, visited my house during my absence, and was seen coming est of it at a velock in the morning. I forbade him my house, and warned him never te go there again. On Friday, Before my arrest, I had a long
talk with him, and he pledged himself never to
come to my house sgain, and spoke in the highest terms of my wife's character.
I took a drink with him and then parted, he
renewing the promise never to visit my wife. I
felt quite subsphy, but did not know what further to do.
About 9 o'clock that night, I undressed to go
to bad, where a knock was heard at the front
door. My wife went to the door and I saked
who was there. I heard Howe say 'I want to
see Mr. Williams, the d—d raneal.' I then
came out into my parlor, and flowe abused
ma and cursed me, shook a case at me and said
I had been speaking about him and my wife,
and that I was ad—d lying—
He repeated the outh, sad placing his hand
behind his back, took hold of a pistol. I then
went back into my chamber and got my revolver I always carry with me when travelling. I
said to him when I came back, 'Go out, I will
talk with you outside." He refused to leave—
renewed his curse, and presented his pistol.
He was beside himself with rage, and was on the
point of shooting me down in my own house
when I fined at him. My wife immediately
went I fined at him. My wife immediately
went I shoot her to self-different excitation. COMMERCIAL PAPER DISCOUNTED AND RE-COLLECTIONS made on all parts of the REW ENG-AND STATES.

The Time calls upon us to 'censure a paraph in a German Sanday paper, in this city, in which two persons of the Trinity—the yather and Son—are nominated, one for the Presidency. Men who write that sort of blasphenous stuff do not need, because they do not fear, the censure of their fellows. But if any protest of ours against the offence which the German paper committed, net only against the Creator, I ut against the bess feelings of the best men and women of the community in best men and women of the community in which the blaspheiny's uttered, will indeed to prevent a repetition of the rank offence, or to bring to a sense of decency the sheet that per-min that ribaldry in its columns, that pro-test is not wanting.
